1	Introduction	1
1.1	Contributions	3
1.2	Outline of the Thesis	5
1.3	Notation	6
2	Problem Statement	7
2.1	Preprocessing Operations	7
2.2	Laurent Polynomials	9
2.2.1	Definitions	10
2.2.2	Arithmetic Operations	11
2.2.3	Interpolation	13
2.3	MIMO-OFDM	15
2.3.1	System Model	15
2.3.2	Review of Coherent MIMO-OFDM Detectors	16
2.3.3	The Problem of Efficient Preprocessing	18
2.4	Problem Statement for LP Matrix Arithmetics	22
2.5	Computational Complexity Metric	24
3	Generic Interpolation-Based Arithmetics of LP Matrices	27
3.1	Brute-Force Algorithm	27
3.2	Interpolation-Based Algorithm	28
3.3	Multistage Interpolation-Based Algorithm	30
3.4	Mapping-Based Interpolation-Based Algorithm	33
3.5	Review of Interpolation-Based Matrix Inversion	35

CONTENTS

3.6	Complexity Analysis	36
3.6.1	Complexity of Per-Point Operations	36
3.6.2	Complexity of Interpolation	37
3.6.3	Complexity of Algorithms	39
4	Interpolation-Based Regularized Inversion of LP Matrices	43
4.1	Interpolation-Based Regularized Matrix Inversion . . .	45
4.2	Rank-1 Update Procedures	46
4.2.1	HPD Matrix Inversion	47
4.2.2	Computation of $\mathbb{H}(\mathbf{A})$ and $\mathbb{F}(\mathbf{A})$	48
4.2.3	Type II Algorithm	50
4.3	Divide and Conquer Procedures	52
4.3.1	HPD Matrix Inversion	53
4.3.2	Computation of $\mathbb{H}(\mathbf{A})$ and $\mathbb{F}(\mathbf{A})$	57
4.3.3	Type II Algorithm	60
4.3.4	Type III Algorithm	62
4.4	Complexity Analysis	66
4.4.1	Analytical Results	66
4.4.2	Numerical Results	67
5	Interpolation-Based QR Decomposition of LP Matrices	73
5.1	QR Decomposition	74
5.1.1	Definition, Computation and Uniqueness	74
5.1.2	Properties	76
5.2	Mapping	79
5.3	QR Decomposition of LP Matrices	85
5.4	Interpolation-Based QR Decomposition Algorithms . .	93
5.4.1	Type II Algorithm	94
5.4.2	Type III Algorithm	94
5.4.3	Algorithms for Sorted QR Decomposition	96
5.5	Extension to Regularized QR Decomposition	98
5.6	Complexity Analysis	100
5.6.1	Analytical Results	100
5.6.2	Numerical Results	104

6	Interpolation-Based LU Decomposition of LP Matrices	111
6.1	LU Decomposition	112
6.1.1	Definition and Conditions for Existence and Uniqueness	112
6.1.2	Computation	114
6.1.3	Reduced LU Decomposition	116
6.2	Mapping	117
6.3	LU Decomposition of LP Matrices	122
6.4	Interpolation-Based LU Decomposition Algorithms	129
6.4.1	Type II Algorithm	129
6.4.2	Type III Algorithm	130
6.5	Complexity Analysis	131
6.5.1	Analytical Results	132
6.5.2	Numerical Results	132
7	Efficient Interpolation	139
7.1	Reformulation of Algorithms	139
7.2	Interpolation with Dedicated Multipliers	142
7.3	Equidistant Base Points	143
7.4	Interpolation by FFT	145
7.5	Interpolation by FIR Filtering	151
7.6	Inexact Interpolation	155
7.6.1	Ad-Hoc Method for Inexact Interpolation	156
7.6.2	Numerical Results	157
8	Conclusions and Outlook	163
A	Notation	165
B	Acronyms	169
	Bibliography	171
